Institute for Excellence in Memory Care

Dining with AL– Maintaining Nutrition & Hydration with Cognitive Loss

The dining experience is not just the time to nourish the body, but a time to nourish the soul. Food is associated with nurturing , celebrations, family, and memories. When cognitive impairment is a guest in the dining room, it can put a person at risk for eating well. This seminar will focus on how cognitive changes can influence nutritional and hydration, Person Centered Care impacts on a person's dining experience, and lastly, how to create supported dining experience.

PRESENTER
Patty Piechocki, CTRS, QMCP, CDCP
Institute for Excellence in Memory Care
(574) 318-4635
patty@alzni.org
