

WEBINAR: Previously Recorded Audio/ Video Seminar

Vascular Contributions to Cognitive Impairment and Dementia (VCID)

Vascular Contributions to Cognitive Impairment and Dementia (VCID) are conditions that arise from stroke and other vascular brain injuries. These changes can cause significant memory, thinking, and behavioral challenges.

This session will give professionals a basic introduction to VCID, describe common symptoms and treatments, and provide examples of best practices when working with Individuals with this diagnosis.

After attending this course participants will be able to:

- **Define and interpret Vascular Contributions to Cognitive Impairment and Dementia (VCID.)**
- **Explain how physicians can help diagnose for VCID**
- **Give examples of common symptoms, and challenges these individuals may possess.**
- **Identify common treatments and management of symptoms.**
- **Give examples of best practices when working with individuals living with VCID.**
- **List resources for more information for families and healthcare professionals in your organization.**
